

**Department of Mathematical Sciences  
COLLEGE OF ARTS AND SCIENCE**

**SUMMER RESEARCH OPPORTUNITIES  
FOR UNDERGRADUATE WOMEN**

**APPLICATION DEADLINE: March 2, 2009**

*The Department of Mathematical Sciences is pleased to offer the following research project for the summer of 2009. Interested students are urged to contact the faculty member(s) directing the project that most interests them. By contacting the faculty member, you can discover more about the project, learn what your responsibilities will be and, if possible, develop a timetable for the twelve-week research period.*

**MATHEMATICAL MODELING AND SIMULATION IN BIOLOGY USING  
MATLAB**

**Professor: Sookkyung Lim

Email: limsk@math.uc.edu**

**PROJECT DESCRIPTION**

**This project is designed to introduce mathematical methods of modeling in biology using matlab codes. Many biological phenomena can be modeled by differential equations that can be solved numerically. In this project we will focus on the heart and blood circulation in the body and derive models of blood flow and pressure.**
